

Figure 1. Policy cover banner.

1. Purpose and Scope

This policy defines how information technology assets, accounts and data are used and protected at Clenergy Australia Pty Ltd. It applies to every employee, contractor and third party who accesses company systems, on company-owned or personal devices, from any location.

The policy supports our obligations under the Privacy Act 1988 (Cth), the Notifiable Data Breaches scheme, and our ISO/IEC 27001 certified information security management system.

2. Document Control

Field	Value
Document ID	CLE-IT-POL-011
Version	6.0
Owner	IT & Security — Head of Information Security
Approved by	Chief Operating Officer
Effective date	1 July 2026
Next review	30 June 2027
Classification	Internal use only

3. Acceptable Use

- Company systems are provided for business purposes; limited reasonable personal use is permitted.
- Never share your account credentials, including with IT staff — IT will never ask for your password.
- Do not install unapproved software, browser extensions or AI tools that process company data.
- Do not use personal cloud storage (Dropbox, personal Google Drive, WeChat) for company documents.

4. Devices and Standard Build

IT issues a standard device based on role. All laptops are enrolled in Microsoft Intune, encrypted with BitLocker or FileVault, and must run the current supported OS release plus the Defender for Endpoint agent. Devices are refreshed on a 4-year cycle.

Role group	Standard device	Specification	Refresh
Office / admin	Dell Latitude 5450	i5 / 16 GB / 512 GB SSD	4 years
Engineering	Dell Precision 3591	i7 / 32 GB / 1 TB SSD	4 years
Design / simulation	Dell Precision 5690	i9 / 64 GB / 2 TB SSD + RTX	3 years
Sales / field	MacBook Air 15" M4	16 GB / 512 GB SSD	4 years
Warehouse / site	Zebra TC58 handheld	Android, rugged	3 years
Executive	MacBook Pro 14" M4 Pro	24 GB / 1 TB SSD	3 years

4.1 Mobile and BYOD

Staff who access email on a personal phone must enrol it in Intune app protection. The company can wipe company data only; personal photos and messages are never accessed. Rooted or jailbroken devices are blocked from all company services.

4.2 Loss or theft

Report a lost or stolen device to the Service Desk immediately (within 1 hour of discovery). IT will remotely lock and wipe the device and rotate the affected credentials.

5. Accounts, Passwords and Access

Access follows least privilege and is granted through role-based access groups in Microsoft Entra ID. Multi-factor authentication is mandatory for every account, including service accounts where technically supported.

Figure 2. Access tiers and the controls required at each tier.

Control	Requirement
Password length	Minimum 14 characters; passphrases encouraged
Password reuse	Last 10 passwords blocked; no reuse across systems
Rotation	No forced rotation; immediate reset on suspected compromise
MFA	Microsoft Authenticator number matching, or FIDO2 key for Tier 0/1
Session timeout	15 minutes idle lock on laptops; 8 hours for web sessions
Joiner / mover / leaver	Access provisioned within 1 business day; revoked within 2 hours of exit

6. Security Incidents

Any suspected incident — phishing, malware, lost device, accidental disclosure — must be reported to **security@clenergy.com.au** or the Service Desk on extension 4400. Staff who report an incident in good faith are never penalised, even where they caused it.

Severity	Example	Response target	Escalation
P1 — Critical	Ransomware, data breach of customer PII	15 minutes	COO + CISO + legal, immediate
P2 — High	Compromised admin account, ERP outage	1 hour	Head of InfoSec
P3 — Medium	Single-user phishing click, malware detected and blocked	4 business hours	Security team
P4 — Low	Spam, policy question, false positive alert	2 business days	Service Desk

Figure 3. FY2025 reported security incidents by type.

7. Data Classification and Handling

Class	Examples	Storage	External sharing
Public	Datasheets, published brochures	Website, SharePoint	Unrestricted
Internal	Policies, org charts, meeting notes	SharePoint / Teams	Staff and contractors only
Confidential	Contracts, pricing, source code	SharePoint with restricted group	NDA + manager approval
Restricted	Customer PII, payroll, board papers	Encrypted, named-access site	Prohibited without CISO approval

8. Software and AI Tools

Software must be requested through the Service Desk catalogue and is licensed centrally. Generative AI tools may only be used through the company-approved tenant (Microsoft 365 Copilot and the internal Clenergy Knowledge Agent). Confidential or Restricted data must never be pasted into a public AI service.

Category	Approved	Requires approval	Prohibited
Productivity	Microsoft 365, Teams	Notion, Miro	Personal cloud drives
Development	VS Code, Git, JetBrains	Docker Desktop, WSL	Cracked or unlicensed IDEs
AI assistants	M365 Copilot, Clenergy Knowledge Agent	Approved vendor AI in contract	Public chatbots with company data
Remote access	Company VPN, Intune-managed RDP	Vendor support tools (time-boxed)	TeamViewer personal, AnyDesk

9. Monitoring, Training and Compliance

- Company systems are logged and monitored for security purposes in line with the Privacy Policy.
- All staff complete security awareness training on induction and annually; simulated phishing runs quarterly.
- Breaches of this policy may lead to loss of access and disciplinary action under the Code of Conduct.
- Questions about this policy: itsecurity@clenergy.com.au.
